SUMMARY

Analytics and Business professional with hands-on experience in SQL-based analysis, business intelligence, and MIS reporting. Skilled in building dashboards using Power BI and Tableau, automating reports, and translating business requirements into actionable insights. Strong in stakeholder communication, documentation, and data-driven operational support.

WORK EXPERIENCE

Software Development Intern

Feb 2025 – May 2025

Ganglia Technologies

Karnataka, India

- Analyzed operational data and configured automated workflows, reducing manual effort by 30%.
- Worked with business and engineering stakeholders to translate requirements into MIS reports, dashboards, and automation logic.
- Developed Python and SQL-based scripts for data processing, monitoring, and issue detection, improving response time by 40%.
- Created SOPs, dashboards, and internal documentation to standardize reporting and onboarding processes.
- Supported issue triaging, data validation, and cross-functional coordination between operations, product, and engineering teams.

ANALYTICS & BUSINESS INTELLIGENCE PROJECTS

Sales Performance & KPI Dashboard (Power BI + SQL)

Portfolio

- Built an end-to-end sales analytics dashboard in Power BI using SQL-sourced data, analyzing total sales, profit, profit margin, and MoM growth across regions and products.
- Designed executive KPIs including Total Sales (2.3M), Profit (286K), Profit Margin, and Sales MoM% to track business performance and trends.
- Implemented interactive slicers and drill-downs by region, state, city, product, and time period to enable granular performance analysis.
- Visualized geographic sales distribution using map-based analysis to identify high- and low-performing regions.
- Delivered a decision-ready dashboard focused on profitability drivers, product-level contribution, and regional sales insights.

British Airways Customer Reviews Analysis (Tableau)

Tableau Public

- Built an interactive Tableau dashboard to analyze British Airways customer reviews across time, geography, aircraft type, and service dimensions.
- Analyzed key metrics including overall rating, cabin staff service, food & beverages, seat comfort, ground service, and value for money.
- Implemented dynamic filters for traveller type, seat class, aircraft group, and time period to enable deep-dive analysis.
- Identified trends in customer satisfaction by country and aircraft, supporting service quality and experience improvement insights.

PUBLICATIONS & RESEARCH

Transformer-Based Sentiment Analysis for Drug Reviews

View Paper

- Applied transformer-based models to analyze large datasets and evaluate system-level performance.
- Focused on practical deployment considerations and interpretation of results for non-technical audiences.
- Presented at the International Conference on Innovations in Science and Technology (2025).

TECHNICAL SKILLS

Business Intelligence: Power BI, Tableau, Looker Studio, Excel

Data Analysis: SQL, Python, Data Cleaning, Data Validation

Dashboards & Reporting: KPI Tracking, MIS

Reporting, Business Metrics

Tools: Git/GitHub, Postman, VS Code, Google Sheets

Concepts: Business Requirements, Stakeholder

Communication, Workflow Automation, Documentation

EDUCATION

Manipal Institute of Technology

Karnataka, India

Master of Computer Applications

2023 – 2025

GH Rasoni Institute of Information Technology

Nagpur, India

Bachelor of Computer Applications

2019 – 2022

CERTIFICATIONS

- IBM: Developing Back-End Applications with Node.js and Express
- University of Colorado: Linux Server Management and Security
- University of London: Machine Learning for All
